Recipe tips

Be sure to read through the entire recipe before you begin cooking.

Rub a little water on your work surface, under the bottom piece of plastic wrap, to keep it from shifting while you pound the chicken.

Achieve a crispy, golden crust with the right level of heat. If the chicken begins to darken too quickly, add more oil to the pan, 1 tablespoon at a time, as needed.

The chicken might have a slight odor as a natural reaction to its vacuum packing. USDA recommends cooking chicken to 165°F.
